

Access to more savings with the automatic prescription discount program

No one should have to worry about how to pay for their medications. If you are currently paying full price for certain prescription medications outside of your pharmacy plan, you may be able to access savings by using the automatic prescription discount program.

The automatic prescription discount program is a prescription savings program made available to you as an Excellus BlueCross BlueShield member. The program offers savings on thousands of brand-name and generic medications at more than 60,000 participating pharmacies.

Free, accessible discounts – no registration required

The automatic prescription discount program:

1. Is a value-add program for members with no costs or enrollment required.
2. Enables members to save on their out-of-pocket costs for their medications not covered under their pharmacy benefits.
3. Minimizes member disruption using a seamless process at the point of sale while ensuring the medication goes through health and safety checks.

The automatic prescription discount program provides you with:

Generics: ~\$9.00
Brands: ~\$26.00

average savings per 30 day Rx*

up to 60%
average savings
