

4 ways you can stay on top of rising prescription costs

Worried about high prescription drug costs? We're here to help. Check out the tips below to score some unexpected savings.

Here are a few strategies you can use to save on your prescriptions.

1 Ask About Generics

Ask your doctor if there are low-cost alternatives to expensive name-brand drugs. Many generics offer the same ingredients for significant savings. Some plans don't charge for Tier 1 generics.

2 Start Small

When starting a new prescription, ask for samples or a short supply to start. That way, if you experience any side effects, or the medication doesn't work as expected, you won't be stuck with more than you need.

3 Consider Home Delivery

Ordering a 90-day supply of your prescriptions through our mail order pharmacy partners can deliver big savings.

4 Look into Drug Discounts

It's right there in the name. If you qualify for drug discounts, you can get help paying for your medications with copay discount cards, manufacturer coupons, and other options.
